Job Title: Software Developer Intern

Location: Surat (On-site)

Company: devxconsultancy Pvt. Ltd. (devx commerce)

About devx commerce

Hey there!

We're **devx commerce**, an AI-first IT services company that partners with **retail and e-commerce brands** across the globe to build scalable tech products. From **headless commerce solutions** to **AI capability centres** - we're not just another tech agency. We work as true partners, helping brands reimagine their tech stacks for growth.

We're a team of **80+ awesome humans** building cool stuff together. While we're serious about delivering top-notch work, we're equally serious about keeping our team happy and having a great time doing it.

About the Role - Software Developer Intern

We're looking for passionate, curious, and driven interns who want to apply their knowledge in real-world web development scenarios. This internship offers you exposure to full-stack development across modern frameworks and platforms including MERN Stack, Next.js, NestJS, and Shopify.

Interns will work closely with senior engineers on live global projects with dedicated mentorship and regular feedback loops.

Your Day Might Look Like:

- Assist in the development of web applications using **MERN stack (MongoDB, Express, React, Node.js)**.
- Build responsive and scalable UI components using **Next.js**.
- Work on backend services and REST APIs using **NestJS**.

- Collaborate on building custom Shopify themes and app integrations.
- Participate in regular code reviews, QA, and sprint planning.
- Troubleshoot bugs and contribute to performance optimization.

Tech Stack You'll Work On:

- **Frontend:** React.js, Next.js, HTML, CSS, JavaScript
- **Backend:** Node.js, Express, NestJS
- **Database:** MongoDB
- **Platform:** Shopify (Liquid, API integration, custom theming)
- **Version Control:** Git, GitHub
- **Project Tools:** Jira, Slack, Figma, Linear

We're Looking for Someone Who:

- Proficiency in Shopify Liquid, HTML, CSS and JavaScript
- Experience with Shopify plus and third-party app integrations
- Understands basic API integrations and RESTful services
- Is curious, loves experimenting, and isn't afraid to break things (and fix them)
- Is a team player who vibes well with people
- Bonus: You've built side projects, participated in hackathons, or freelanced before

Perks & Benefits

Unlimited paid leaves

Flexible timings (no punch-ins)

Team outings, hackathons, and random chai breaks

Chance to work on international projects
